

# CPH Introduces the New Patient Portal Welcoming Better Access to Your Care

Cedar Point Health is undergoing an internal transition to a new Electronic Health Record (EHR) system. This upgrade is designed to improve efficiency, enhance care coordination, and provide better overall experience for both our patients and staff.

Beginning June 1, the current portal will act in a “read-only” capacity as we transition. For more information visit us at [www.cedarpointhealth.com](http://www.cedarpointhealth.com).

## Manage Appointments

Request and schedule appointments, view upcoming appointment details, and get directions to your appointment location.

## View Medications

Request medication refills and view your current and past medications including dosage, prescription dates, remaining refills, and prescriber information.

## View and Manage Health Records

View, download, and send your most up-to-date health records on any internet-enabled device. View your current vitals, immunizations, lab results, and other important health information.

## Manage Your Profile

Update your personal and contact information, set your preferred provider and medical location, and update your login information and insurance information.

## Manage Documents & Forms

Download, view, and submit financial, administrative, and medical documents and forms. You'll also be able to access provider recommended health education materials.

## Send Secure Messages

Send and receive secure messages to and from your provider. You'll be able to securely ask medical and insurance questions, request medical records, and send documents and forms to your provider.
